To start, add rspec-retry to the test group in your Gemfile, then bundle install to add it. Then, configure RSpec to use it–I prefer to do this in a separate file like spec/support/rspec_retry.rb, but you can also include it in your main spec/rails_helper.rb file, as shown in rspec-retry’s README. Whatever works for you.

Everyday Rails: Testing With RSpec - A PlanarFe Adventure
Aside from the DSL that Rails provide for the model, RSpec also provides us with model specs, which allow us to properly unit test our models. We saw how we can tackle issues in the BDD way, by using specs and test-driven development. What is your preferred way to test models? Do you use BDD in your everyday work?
