The papers are organized in topical sections on eSociety: social media analysis; eSociety: ICTs in education and science; eSociety: legal, security and usability issues; ePolity: electronic governance and electronic participation; ePolity: politics of cyberspace; eCity: urban planning and smart cities; eHealth: ICTs in public health management; eEconomy and eFinance: finance and knowledge management.

Draitser uses humor as a means of understanding the attitudes and customs, beliefs and idiosyncrasies, and inter- and intra-group relationships of this multinational society. In analyzing the jokes, he seeks to determine what makes them funny, why certain groups are targeted, and even why a mediocre joke can be received with great enthusiasm.

This book offers a theoretically driven, empirically grounded survey of the role visual communication plays in political culture, enabling a better understanding of the significance and impact visuals can have as tools of political communication. The advent of new media technologies have created new ways of producing, disseminating and consuming visual communication, the book hence explores the theoretical and methodological underpinnings of visual political communication in the digital age, and how visual communication is employed in a number of key settings. The book is intended as a specialist reading and teaching resource for courses on media, politics, citizenship, activism, social movements, public policy, and communication.

This book brings together an international group of experts to present the latest psychosocial and developmental criminological research on cyberbullying, cybervictimization and intervention. With contributions from a wide range of European countries, including Cyprus, Greece, Ireland, Italy, France, Hungary, Spain, and the United Kingdom, as well as from Canada and the USA, this authoritative volume explores the nature, risk factors, and prevalence of cyberbullying among children and adolescents. A particularly original focus is directed towards the Tabby project (Threat Assessment of online Bullying Behaviour among Youngsters), an intervention programme based on the threat and risk assessment approach which seeks to prevent the occurrence of violence and its recidivism. Presenting cutting-edge research on developmental criminology and legal psychology, *International Perspectives on Cyberbullying* is a comprehensive resource for practitioners, teachers, parents, and researchers, as well as scholars of criminology, psychology, and education.

This volume constitutes the refereed proceedings of the 4th International Conference on Digital Transformation and Global Society, DTGS 2019, held in St. Petersburg, Russia, in June 2019. The 56 revised full papers and 9 short papers presented in the volume were carefully reviewed and selected from 194 submissions. The papers are organized in topical sections on e-polity: governance; e-polity: politics online; e-city: smart cities and urban planning; e-economy: online consumers and solutions; e-society: computational social science; e-society: humanities and education; international workshop on internet psychology; international workshop on computational linguistics.

Read this book before you write your thesis or journal paper! *Communicating Science* is a textbook and reference on scientific writing oriented primarily at researchers in the physical sciences and engineering. It is written from the perspective of an experienced researcher. It draws on the authors' experience of teaching and working with both native English speakers and English as a Second Language (ESL) writers. For the range of topics covered, this book is relatively short and tersely written, in order to appeal to busy researchers. *Communicating Science* offers comprehensive guidance on: Research reports: journal papers, theses, and internal reports Review and publication process Conference and seminar presentations: lectures and posters Research proposals Business plans Patents Popular media Correspondence, CV's, and job hunting Writing well: writing strategies and guidance on English composition and grammar Graduate students and early career researchers will be guided through the researcher's basic communication tasks: writing theses, journal papers, and internal reports, presenting lectures and posters, and preparing research proposals. Extensive best practice examples and

analyses of common problems are presented. Advanced researchers who aim to commercialize their research results will be introduced to business plans and patents, so that they can communicate optimally with patent attorneys and business analysts. Likewise, advanced researchers will be assisted in conveying the results of their research to the industrial and business community, governmental circles, and the general public in the chapter on popular media. Researchers at all levels will find the chapter on CV's and job hunting helpful. The Writing Well chapter will assist researchers to improve their English usage in scientific writing. This chapter is oriented both at native English speakers, who have an intuitive command of English but often lack formal instruction on grammar and structure, and non-native English writers, who often have had formal instruction but lack intuitive grasp of what sounds good. Mentors will find the book a useful tool for systematically guiding their students in their early writing efforts. If your students read this book first, you will save time! Communicating Science may serve as a textbook for graduate level courses in scientific writing.

This book is the first collective volume specifically devoted to the multifaceted phenomenon of intensification, which has been traditionally regarded as related to the expression of degree, scaling a quality downwards or upwards. In spite of the large amount of studies on intensifiers, there is still a need for the characterization of intensification as a distinct functional category in the domain of modification. The eighteen papers of the volume contribute to this aim with a new approach (mainly corpus-based). They focus on intensification from different perspectives (both synchronic and diachronic) and theoretical frameworks, concern ancient languages (Hittite, Greek, Latin) and modern languages (mainly Italian, German, English, Kiswahili), and involve different levels of analysis. They also identify and examine different types of intensifiers, applied to different forms and structures, such as adverbs, adjectives, evaluative affixes, discourse markers, reduplication, exclamative clauses, coordination, prosodic elements, and shed light on issues which have not been extensively studied so far.

Construction Grammar explains how knowledge of language is organized in speakers' minds. The central and radical claim of Construction Grammar is that linguistic knowledge can be fully described as knowledge of constructions, which are defined as symbolic units that connect a linguistic form with meaning.

This book explores the various forms and functions of follow-ups in a range of political speech events. Follow-ups are conceptualized as communicative acts, in and through which a prior communicative act is accepted, challenged, or otherwise negotiated by ratified participants in the exchange or by third parties. The broad view suggested here accommodates a large variation in the functions of follow-ups, e.g. positioning, third-party involvement, evaluation and argumentation, ratification, support, challenge and attendance to face wants. These variations are explored in a range of cultural environments, such as the UK, The Netherlands, Israel and France. Inter-cultural exchanges are studied through the analysis of diplomatic discourse, interpreting and cross-cultural comparison.
